PROFESSIONAL SUMMARY

B.E. Computer Science & Engineering graduate (2025) with hands-on experience in end-to-end data pipelines, predictive modelling, and BI dashboard development across datasets of 400K+ rows. Completed two internships covering data analytics and AI/cloud platforms. Proficient in Python, SQL, Power BI, and Excel, with a demonstrated ability to translate raw data into actionable business insights. Seeking a Data Analyst / Business Analyst role.

INTERNSHIP EXPERIENCE

Data Analytics Intern | MedTourEasy

July 2025

Remote · 1 month · Healthcare analytics domain

- Conducted end-to-end exploratory data analysis on a healthcare dataset examining mortality age differences between right-handed and left-handed individuals using Python (Pandas, NumPy, Matplotlib).
- Applied statistical hypothesis testing and data wrangling techniques under mentor supervision to identify significant trends in life-expectancy data.
- Delivered a complete project presentation documenting methodology, analytical findings, and business implications to the project mentor.

AI & Cloud Intern | Edunet Foundation × IBM SkillsBuild

July – August 2024

Virtual · 4 weeks · AICTE Recognized · IBM SkillsBuild Certified

- Completed a structured 4-week program on IBM Cloud and Watson Studio covering data analytics, AutoAI model building, NLP, and Generative AI fundamentals.
- Built and deployed a conversational chatbot using IBM Watson as part of a team-based real-world problem-solving challenge.
- Earned IBM SkillsBuild certification alongside Edunet Foundation and AICTE internship completion credentials.

PROJECTS

A Stacked Ensemble Approach for Multi-Class Classification of NAFLD and AFLD Using Synthetic Patient Data

January – May 2025

- Built a stacked ensemble machine learning model for multi-class fatty liver disease classification using 1 million synthetic patient records.
- Integrated XGBoost, SVM, ANN, and LightGBM with SHAP-based explainable AI.
- Focused on scalable, interpretable early detection of NAFLD and AFLD.

End-to-End Telecom Churn Analysis (ETL + BI + ML) |

December 2025

- Designed and implemented an end-to-end ETL pipeline using Python and SQL to clean, validate, and process 6,419 customer records, successfully isolating a 27% baseline churn rate.
- Developed predictive models using Random Forest algorithms to flag 72% of high-risk new joiners, identifying month-to-month contracts as the primary driver of attrition.
- Built an interactive Power BI dashboard with complex DAX measures to break down regional and service-category churn risk, delivering structured insights for data-driven retention strategies.

Meta Advertising Performance Analytics for ROI Optimization |

November 2025

- Analysed over 410K historical performance records across 4 interconnected marketing datasets to track conversion rates, audience engagement metrics, and spend efficiency.

- Formulated advanced DAX formulas in Power BI to track key operational metrics including CTR, conversion funnel drops, and ROAS across multiple demographics.
- Delivered structured presentations detailing high-engagement, low-conversion bottlenecks among key target audiences to improve budget optimisation and strategic ad scheduling.

Adventure Works Sales & Profitability Dashboard |

October 2025

- Evaluated 60,384 transaction entries across 12 analytical variables using advanced Excel formulas, executing deep time-series, product-line, and cohort-level sales performance tracking.
- Designed a centralised performance dashboard visualising key year-over-year revenue changes, geographical distribution, and top product configurations.
- Identified critical revenue drivers and structural trends, providing actionable business logic recommendations to maximise overall category profitability.

TECHNICAL SKILLS

Programming Languages: Python (Pandas, NumPy, Matplotlib), SQL, R

BI & Visualisation Tools: Power BI (DAX, Data Modelling), Microsoft Excel (Advanced Pivot Tables, Array Formulas, Dynamic Dashboards)

Databases: SQL Server Management Studio (SSMS), Relational Database Management Systems (RDBMS)

Machine Learning: Random Forest, Logistic Regression, AutoAI (IBM Watson Studio)

Core Competencies: Exploratory Data Analysis (EDA), Statistical Analysis, ETL Pipeline Design, Quantitative Aptitude, Data Storytelling

Languages: English (Professional), Tamil (Native)

EDUCATION

Bachelor of Engineering — Computer Science & Engineering | Ganadipathy Tulsi's Jain
Engineering College

April 2025

Vellore, Tamil Nadu · CGPA: 8.17 / 10.00

CERTIFICATIONS

Google Data Analytics Professional Certificate

March 2026

Coursera

End-to-end data analytics lifecycle, data preparation, structured analysis, and visualisation principles applied to real-world business challenges.

Data Analyst in Python — Career Track

February 2026

DataCamp

Advanced data manipulation, exploratory data analysis, and scientific visualisation using Pandas, NumPy, and Matplotlib.

IBM SkillsBuild AI & Cloud Certification

August 2024

IBM SkillsBuild / Edunet Foundation / AICTE

Cloud computing, Watson Studio, AutoAI model building, NLP, and chatbot development on IBM Cloud.

Microsoft Excel Professional Certification

November 2022

Naan Mudhalvan × Microsoft

Advanced lookup functions, array formulas, Pivot Tables, interactive dashboard building, and programmatic data validation.
